Energy Business Trip to Korea

15-19 February 2027, Seoul & Naju

Energy Infrastructure for the Integration of Renewable Energy

Program Objectives and Overview

The aim of this Energy Business Trip is to provide German companies specializing in grid infrastructure, energy storage, and smart grids with an opportunity to present their technologies and solutions to an interested audience of South Korean companies, energy utilities, and institutions, while establishing long-term business relationships.

A key component of the Energy Business Trip is the Specialist Conference in Seoul, where participating German companies will have the opportunity to showcase their technologies and solutions to a broad audience of Korean industry professionals.

In addition, exclusive technical visits to Korea Electric Power Corporation (KEPCO) and Korea Power Exchange (KPX), along with individual 1:1 business meetings, will enable participants to identify concrete opportunities for cooperation and strategically prepare for market entry. The trip is primarily aimed at German SMEs offering solutions in grid control, high-voltage direct current (HVDC) and flexible AC transmission systems (FACTS), energy storage integration, digital grid management systems, forecasting software, and virtual power plants (VPPs).

About the German Energy Solutions Initiative

The German Energy Solutions Initiative, led by the Federal Ministry for Economic Affairs and Energy (BMWE), is a key program supporting German small and medium-sized enterprises (SMEs) in successfully entering and expanding into international markets. Through expert market insights, extensive global networks, and tailored support programs, the initiative helps German companies achieve sustainable international business growth while promoting climate-friendly energy technologies and solutions “Made in Germany” worldwide.

For more information, please visit the official website: www.german-energy-solutions.de

This Energy Business Trip to South Korea is part of the German Energy Solutions Initiative of the BMWE and is organized by KGCCI DEinternational Ltd. (AHK Korea).

AHK Korean-German Chamber of Commerce and Industry 주한독일상공회의소

Gefördert durch:
Bundesministerium für Wirtschaft und Energie
aufgrund eines Beschlusses des Deutschen Bundestages
