Women Networking Event

Empowering Women in Hydrogen: Pathways from Learning to Leadership

Korean-German Energy Partnership Team

Friday, 05.12.2025, 09:00 – 11:00h (KST)

Only one in five leadership roles in the energy sector are held by women, according to the World Economic Forum's Global Gender Gap Report 2022. Despite growing recognition of the value that diversity brings to innovation and business success, women remain underrepresented in leadership across the energy sector. The hydrogen industry, as a rapidly evolving field, offers unique opportunities for women to lead, learn, and shape the future of sustainable energy.

Join us for an inspiring networking event dedicated to empowering women in the hydrogen sector. This event will bring together women from academia and the hydrogen business environment who have navigated unique pathways from education to leadership positions. Our speakers will share key facts and figures on women's representation in the energy sector, alongside their personal journeys and experiences from the business and higher education sector.

Language: English

Venue: Gloucester Hotel 2F (Meeting room 2)

Fee: Free of charge (first-come, first-served basis due to limited seating)
